

Barossa Valley NEFR 2010 Program V.2

This program attempts to provide a range of electric glider events – the popular Limited Electric Glider, Open Electric Glider, Height Limited Glider and Radian Glider. The program will be restructured based on entries – if there are less than 5 entries in any one class it will be dropped from the program and the time slots allocated to that event will be transferred to more rounds of the event(s) that are more popular – so enter the events that you want to see go ahead!

The program is flexible – there will be plenty of time for free flying. Bring your projects along and fly them when you can – the more the merrier – the events are set as a guide, but we have had some spectacular flying at Barossa in the past such as Bill Hamilton's test flights of his F-16 ducted fan and Mani Riederich's fabulous scale Me-262. Join in this fun and social event! Fun flying will follow each scheduled event – for example, a 40 minute slot may have been allowed for an event but it may only take 15 minutes – so, the remaining 25 minutes will be available for fun flying.

National Electric Flight Rally

Easter Friday 2 April

There are four rules at this event:

1. You must have fun and enjoy the rally.
2. You must be a current member of the MAAA.
3. You must fly safely.
4. Event rules may be modified to comply with rule 1.

Note – this program subject to change depending on entry levels and organisational needs – this version 17-2-10 – consult the AEFA web site for the latest version.
